*DVEeLink™*

# Company & Product Overview

## THE COMPANY

VMC specializes in testing, communicating with and designing heavy-equipment and truck vehicle data buses, sensors and controls and communicating these via LAN, radio and Internet for over 10 years. VMC is located in Redmond WA.

VMC is dedicated to providing solutions to vehicle manufacturer's customers needs. VMC's customers include world-class companies, such as CAT, MACK, PACCAR, Freightliner, Raymond, Ford and GM.

## WHAT IS DVEeLink™

DVEeLink™ is the on-board system hardware and software that links vehicle, data bus, SmartDisplay™, Radio Modem and GPS.

## PRODUCT CONCEPT

VMC has filed for trademarks for the name DVEeLink™. DVEeLink™ stands for Driver Vehicle Enterprise Link. The product provides means of communication between three participants:

- Driver** by means of a display with buttons and sound (SmartDisplay™)
- Vehicle** by means of the Vehicle Data Bus (J1708/J1587, J1939, Cat Data Link), and
- Enterprise** (i.e. your business) connecting your equipment by cell phone, satellite or a standard phone line connection, then on to a Web site or PC.

## VMC's DVEeLink™ TECHNOLOGY PLATFORM

DVEeLink™ technology is affordable, it works, and it is in use in the industry  
DVEeLink™ connects the vehicle (via the vehicle data bus to a PC or to the Internet)  
DVEeLink™ enables you to improve your existing service to your customers  
The display portion of DVEeLink™ technology is well developed and in high volume production in the over-the-highway and heavy equipment industries. The "wireless-pipe" portion of the technology has been proven, and is undergoing vigorous testing and further development

### • VMC's ROLE WITH DVEeLink™

- To connect the driver and vehicle to the Internet
- To provide the HW, SW products, protocols and wireless interfaces to make it all work
- To provide "one stop" wireless service provider solution
- To allow service providers to work directly together with VMC to ensure seamless operation
- To provide cost effective speed and coverage through a network of wireless service providers

# Product Specifications

## DVEeLink™ IS AS SIMPLE AS 1...2...3

- You Can See It: The electro-luminescent screen can be seen in direct sunlight
- It's Affordable: Requires only an inexpensive industrial computer.
- It Works: Over 5,000 new forklifts and highway trucks equipped in 2000.

## DVEeLink™ BENEFITS TO THE OWNER

- DVEeLink™ is affordable and it works
- DVEeLink™ connects the vehicle and operator/customer/service technician to the machine and transmits data in real time
- DVEeLink™ enables your customers to be more profitable
- DVEeLink™ is rugged and has a robust design
- DVEeLink™ monitors fuel consumption from the vehicle data bus allowing for exact fuel reporting

## DVEeLink™ BENEFITS TO THE DRIVER/OPERATOR/OWNER

- DVEeLink™ reduction in paper work (fuel tax, driver, inspection logs)
- DVEeLink™ convenient communication to the enterprise
- DVEeLink™ information is readily available
- DVEeLink™ allows for "off-board" coordination of loading docks, border crossings, weigh stations
- DVEeLink™ gives the operator total control

## DVEeLink™ ENABLES OFF SITE CONTROL OF VEHICLE SYSTEMS

- Fuel tax reporting
- Maintenance scheduling
- Trouble shooting and diagnostic
- Fault reporting
- Increased sales of parts and service opportunities
- Driver logs
- Lube and maintenance guide
- Safety check for single operators

In summary **DVEeLink™** is your company's link to the Internet connecting Driver, Vehicle and Enterprise into a simple to use system that will provide cost effective, safety, and improved relations with existing customers.
